Full Australian working rights (Temporary Graduate visa, subclass 485)

SUMMARY

Computer Science & Cybersecurity graduate from UWA (WAM 81.1), two-time Top of Cohort in cybersecurity units. Experienced in requirements gathering, stakeholder engagement, and process documentation through end-to-end delivery of a client compliance application. Strong communicator who bridges technical and non-technical contexts facilitating labs across 10+ units while coordinating with clients and mentors on a 12-week delivery.

EDUCATION

Bachelor of Science, Computer Science & Cybersecurity (WAM 81.1)

University of Western Australia

Feb 2023 – Dec 2025

Crawley, WA

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, Bash

Security: Kali Linux, Metasploit, Nmap, sqlmap, OWASP ZAP, Ghidra

Business Analysis: Requirements Gathering, User Stories, Process Documentation, UAT, Stakeholder Management

Analysis & Debugging: GDB, Static & Dynamic Analysis, Secure Code Review, Fuzzing, tcpdump

Frameworks & Libraries: React Native, Flask, Expo

Web Development: HTML, CSS, JavaScript, TypeScript, jQuery, Bootstrap

Databases: PostgreSQL (Supabase), SQLite

Tools & Platforms: Git, Linux, Docker, PowerShell

UI/Product Design: Figma, Canva

Project Management: Agile, Scrum

PROFESSIONAL EXPERIENCE

Lab Facilitator

The University of Western Australia

Jul 2025 – Present

Crawley, WA

- Facilitated labs, tutorials, and workshops across 10+ undergraduate computer science and cybersecurity units, including secure coding, computer networks, software requirements, databases, and web development.
- Marked assignments, exams, and oral assessments, providing clear feedback and maintaining consistency across large student cohorts, earning consistently high student teaching evaluations (4.5+/5).
- Coordinated marking and student queries as a senior facilitator for Secure Coding (CITS3007), supporting the unit coordinator with assessment oversight.
- Provided one-on-one and group support during labs, invigilated tests, and conducted oral assessment interviews, while managing routine student queries to lighten the unit coordinator's load.

Private Tutor

Trinity Residential College

Aug 2024 – Present

Crawley, WA

- Delivered one-on-one and small-group tutoring in computer science and cybersecurity to students from UWA, Curtin, and other universities.
- Supported students through programming assignments, debugging, and exam preparation, adapting explanations to varying skill levels to help students build confidence and improve their results.
- Recognised with the Academic Tutoring Contribution Award for consistent student impact.

Website Development Intern (Autonomous Shuttle Bus)

Renewable Energy Vehicle Project

Dec 2024 – Apr 2025

Crawley, WA

- Rebuilt and modernised two public-facing websites (roblab.org, therevproject.com), replacing an outdated platform with a custom HTML/CSS/JS build and adding new pages and design systems.
- Collected, sorted, and prepared vehicle footage datasets used to train AI models for autonomous vehicle development, working alongside engineering students across mechanical, electrical, and software disciplines.

- Authored design and technical documentation so the next cohort of student developers could maintain and extend the sites after handover.

Event Support Intern

Jul 2024 – Oct 2024

City of Swan

Midland, WA

- Supported delivery of major community events including the Avon Descent and a new BMX track opening, assisting with setup, packdown, and on-site coordination.
- Assisted with migration of the City's online community engagement platform (swanengage.swan.wa.gov.au), used to support local area planning and resident consultation.

PROJECTS

STARS Compliance Tracking Mobile App — Client Project (UWA Nursing Department) *Jul 2025 – Dec 2025*

- Gathered and analysed compliance requirements directly with the UWA Nursing Department, translating stakeholder needs into a working mobile and web application delivered within a 12-week timeline; served as initial project manager, establishing team structure and aligning a 6-person team.
- Validated features against client requirements through iterative review and acceptance testing with the Nursing Department before final handover.
- Architected and built the Supabase backend, designing the database schema, relationships, triggers, and data integrity logic, then onboarded teammates on its structure through walkthroughs and documentation.
- Built the onboarding compliance feature end to end, from the React Native front-end forms to the backend logic, handling the app's most complex data flows for tracking compliance items, expiry, and multi-stage progression (e.g. vaccine dose sequences).

Portfolio Website — zenflamex.github.io

2024 – Present

- Designed and built an interactive desktop-OS themed portfolio site featuring draggable windows, an ambient rain canvas, and sound, using vanilla JavaScript and HTML/CSS.
- Implemented a physics-based throwable book easter egg using the Matter.js library.

VOLUNTEER EXPERIENCE

Committee Member, Coders for Causes UWA (*Feb 2025 – Mar 2026*): Supported student-led software projects for non-profits; helped organise technical workshops, project presentations, and outreach events.

Project Lead, Coders for Causes Winter 2025 Beginner Project (*Winter 2025*): Mentored beginners in web development fundamentals, Git/GitHub workflows, debugging, and collaborative coding.

UniMentor, UWA (*Jun 2024 – Jun 2025*): Mentored newly enrolled students through their transition to university, advising on academics and campus life.

AWARDS & ACHIEVEMENTS

- Top of Cohort — Penetration Testing, UWA (2025)
- Top of Cohort — Defensive Cybersecurity, UWA (2024)
- Academic Tutoring Contribution Award, Trinity Residential College (2024)
- Academic Excellence Award, Trinity Residential College (2023, 2024)
- Global Excellence Scholarship, UWA (2023)

CERTIFICATIONS

- IBM Z Xplore: Concepts (2026)
